CAREER DEVELOPMENT

WEB SOLUTIONS (WSOL), INC.   2012 – 2017
Web Developer

- Developed custom web applications and solutions for clients, using ASP.Net, C#, and MVC on the Ektron CMS and Episerver CMS systems.
- Multi-tasked client support, including troubleshooting of issues and fixes for various clients, as well as new client request implementations when needed.
- Recommended and supported conversion to the Git source code repository.

EKTRON, INC.   2011 – 2010
Application Engineer

- Worked with the Ektron Professional Services Group on client implementation projects involving the Ektron CMS400.Net content managment system. Duties included custom front-end and back-end development solutions, working with clients, software installation and upgrades.
- Developed a process for using SSL with the Ektron CMS on a per page basis.
- Developed a search/taxonomy based content filtering process.

CANYON COUNTY – CALDWELL, IDAHO   2007 – 2011
Webmaster
- Responsible for the county's web presence, application development and maintenance using ASP.Net, C#, and the Ektron CMS400.Net web content management system. Duties also include software evaluation and testing, as well as gathering project and user requirements.
- Developed custom user authentication against both secured Active Directory system and Ektron CMS system.
- Developed multiple custom user-controls to integrate legacy functionality and external data into the county website.
- Developed secure Criminal Probation lookup application for local law enforcement personnel.

MICRON TECHNOLOGY, INC. – BOISE, IDAHO   1993 – 2007
2005 – 2007: Enterprise Solutions Operations
- Supported multiple enterprise level technologies and systems, including Documentum, Micron Custom Workflow, Crystal Reports, Active Batch, Cognos, Email, Paging, and Microsoft SharePoint.
- Primary third level customer support for Documentum and Micron Custom Workflow.
- Primary day-to-day support and management for Micron's worldwide Documentum electronic document management system, which contained over 12TB of data.
- Developed, deployed, and supported a web service for programmatically interacting with Micron's Documentum environment, and multiple self-service web based utilities to allow end-users to manage their documents.

2004 – 2005: Corporate Web Applications Team
- Assisted in the management and support of Micron's web environment.
- Developed and maintained the Roadmaps web application. A web based application with an MSSQL back-end that tracked the current and future technology roadmaps for Micron Information Systems.

1999 – 2004: Enterprise Business Systems Web Developer
- Developed and maintained the Enterprise Business Solutions website.
- Supported the SAP Application Help system, using SAP's InfoDB and later SAP's Knowledge Warehouse systems.
- Developed the TRAVIS (Tables, Reports and Views Information System) web application that reported data from an Oracle database detailing the data structure for Micron's Data Warehouse environment.
- Developed the Data Staging web application, that tracked who had access to the Data Staging environment, and allowed users to request additional access. Incorporated workflow for approvals, and queries into MS SQL and Active Directory.
